

Yield Maps

Easily upload and analyse yield maps in the Contour platform. Upload maps from any manufacturer, with all data automatically cleaned and converted behind the scenes. The results can be used to understand field variation cause and effect.

Start to piece together the story of a crop, identifying areas of interest and measuring the impact of decisions to shape management of future cropping.

RHIZA's quick and easy tool allows users to analysis their yield data without the hassle of conventional farm software solutions, compatible with all major manufactures.

Understand field variations

- ✔ Click and forget upload process
- ✔ Year on year analysis
- ✔ Field performance ranking
- ✔ Filter and analyse data with ease
- ✔ Yield averages at farm and field level
- ✔ Filter maps to remove out lying data
- ✔ Total tonnages at crop and field level
- ✔ Evaluate crop performance
- ✔ Field/crop benchmarking
- ✔ Validate previous years practices
- ✔ View multiple years to pick up on trends
- ✔ Understand yield limiting factors within a field
- ✔ Assist with future years cropping/practices
